

May 30, 2020

Dear Residents and Family,

I am pleased to inform you that we have no active cases of COVID-19 on campus.

On May 21 and 22, I was notified that two separate staff persons had tested positive for COVID-19. In response, Brewster administered over 300 tests of residents and staff on campus to identify any potential transmission of the virus at Brewster. All the tests returned were negative for COVID-19. A number of residents were retested this past week as an additional level of precaution. All these tests have returned negative for COVID-19.

This fantastic news is the result of the diligence of our residents, staff, and family members in assuring we all follow the interventions in place to mitigate the risk of this virus spreading on campus. I thank you all for your discipline, dedication, and your grace during this time.

Joe Ewert
President and CEO
