

September 23, 2020

Dear Residents and Family,

On September 2, Brewster Health Center began routine testing of all staff each week to identify pre-symptomatic and asymptomatic cases of COVID-19. Identification of any positive staff members results in contact tracing and further testing of residents with potential exposure. This week we identified two new positive cases of COVID-19 in the Brewster Health Center which includes one staff person and one resident.

We are following these results with additional testing. Residents and their DPOAs will be called directly by a Brewster representative if they need to be tested. **You do not need to do anything if you have not been called directly; this letter is for informational purposes only.**

The Brewster Health Center is in the Red Phase at this time. Please visit our webpage www.brewsterliving.org for details on the Red Phase.

The resident who tested positive has moved into the COVID-19 neighborhood and is being cared for by a team of our dedicated COVID caregivers.

I will update you as soon as we have additional information. Thank you.

Joe Ewert
President and CEO
